

CLAIMS

1 1. A transport tape having a multiplicity of pockets arranged next to one
2 another for accommodating the components to be transported, it being possible for the
3 pockets to be closed via a cover, wherein said cover is formed by lids which are
4 arranged on the transport tape in a pivotable manner.

1 2. The transport tape as claimed in claim 1, wherein the transport tape has a
2 component tape and a lid tape fixed thereon, said component tape being provided with
3 said pockets for accommodating the articles to be transported, and said lid tape being
4 provided with a multiplicity of said pivotable lids.

1 3. The transport tape as claimed in claim 1, wherein said lids are mounted on
2 the transport tape via articulations.

1 4. The transport tape as claimed in claim 3, wherein said articulations are
2 formed in one piece with said lids and a base of the transport tape.

1 5. The transport tape as claimed in claim 3, wherein said articulations are
2 designed as a film hinge.

1 6. The transport tape as claimed in claim 1, wherein said lids are secured
2 against opening in the closed position by friction grip and/or form grip.

1 7. The transport tape as claimed in claim 6, wherein said lids have
2 projections which engage in said pockets and become clamped with the latter.

1 8. The transport tape as claimed in claim 7, wherein said projections, with
2 outer peripheral sections, bear over the surface area against inner peripheral sections
3 of said pockets, opposite bottom surfaces of said projections and of said pockets being
4 at a distance from one another, so that an intermediate space for accommodating the
5 components is formed.

1 9. A transport tape having a multiplicity of pockets arranged next to one
2 another for accommodating the components to be transported, it being possible for said
3 pockets to be closed via a cover, wherein said cover is designed to be displaceable
4 along the transport tape.

1 10. The transport tape as claimed in claim 9, wherein the transport tape has a
2 component tape which is provided with said pockets for accommodating the articles to
3 be transported, and said cover is designed as a tape which is arranged on said
4 component tape and can be displaced along said component tape.

1 11. The transport tape as claimed in claim 9, wherein said cover consists of a
2 plurality of lids which in each case cover at least one of the pockets and can be
3 displaced along the transport tape.

1 12. The transport tape as claimed in claim 10, wherein said component tape
2 consists of plastic or metal.

1 13. The transport tape as claimed in claim 10, wherein said lid tape consists of
2 plastic or metal.

1 14. The transport tape as claimed in claim 9, wherein the transport tape is
2 provided with guide apertures for guiding the transport tape, for example on a reel or in
3 a feeder.

1 15. The transport tape as claimed in claim 9, wherein the transport tape is a
2 blister tape.

1 16. The transport tape as claimed in claim 2, wherein said component tape
2 consists of plastic or metal.

1 17. The transport tape as claimed in claim 2, wherein said lid tape consists of
2 plastic or metal.

1 18. The transport tape as claimed in claim 1, wherein the transport tape is
2 provided with guide apertures for guiding the transport tape, for example on a reel or in
3 a feeder.

1 19. The transport tape as claimed in claim 1, wherein the transport tape is a
2 blister tape.
